

CHRONIC HOMELESSNESS IS A CRITICAL PROBLEM

A person is chronically homeless if they:

Have a qualifying disability that prevents them from maintaining work or housing

Have been homeless for **1 year** or longer, or have experienced at least **4 episodes** totaling **12 months** of homelessness in the last three years

Most are unsheltered:

in cars

in tents

on the street

Compared to the general homeless populations, chronically homeless people suffer from higher rates of:

- ▶ poor health
- ▶ mental illness and substance abuse
- ▶ victimization

CHRONIC HOMELESSNESS IS COSTLY TO ADDRESS IN KING COUNTY:

Each year, it costs:

*Average Permanent Supportive Housing cost per person per year

**3,552
PEOPLE**

were chronically homeless in 2018**

increase in chronic homelessness **over 2017** (779 people)**

WHY PEOPLE SLEEP OUTSIDE

Barriers to accessing housing

Chronic health and safety problems

Untreated mental illness

Negative experiences with emergency shelter

Fear of separating from pet or loved one

Fear of strangers

of people who are homeless would move into safe and affordable housing if available**

**King County
